 github.com/Moozzii |  linkedin.com/in/moez-rehman-428375295/

Skills

Languages: C/C++, JavaScript, Python

Technologies & Tech: Docker, Apache Kafka, Redis, NextJs, ReactJs, MongoDB

Projects

Anonymous-Messaging App

- Created a website where users can publish messages anonymously
- Ensured user anonymity by hiding client identities for each posted message.
- Utilized Next.js for both the frontend and backend development.
- Integrated Auth.js for secure user authentication.
- Implemented features allowing multiple clients to publish and view messages anonymously.

E-commerce App

- Developed an e-commerce application with a focus on a seamless shopping experience.
- Utilized Node.js for backend development and React.js for building an interactive and responsive frontend.
- Ensured a secure and user-friendly interface, optimizing performance and usability.

Blog App

- Built a blogging platform using AppWrite and React.js.
- Implemented features such as user authentication, post creation, editing, and deletion.
- Integrated a rich text editor for composing blog posts.

- Managed user data and posts with Appwrite's backend-as-a-service platform.

Password Generator App

- Developed a password generator application using React.js.
- Implemented features to generate strong, random passwords based on user-selected criteria.
- Created a user-friendly interface for easy password generation and copying.
